

Victor Kim (Russia) decided to document his Capra World Slam all at one time with 16 different species of goats. All of Victor's hunts were booked through **Profihunt** and a few were self-guided. Victor has really been after these goat species over the last few years. Victor was extremely busy in 2013 as he was able to collect 12 different species. It will take us a couple of issues to get caught up with Victor's trophies, so look for more from him in the next couple of issues of *SLAM QUEST*.
