

Zeev Nederman (TX) achieved our "Caucasus Quad Slam" back in September 2013 after taking a mid-Caucasian tur, a Kuban (Western) tur, and a Caucasian chamois. Zeev had already taken the Dagestan (Eastern) tur in June 2007. All of Zeev's Caucasus animals were taken with **Profihunt**. We know that we have used all of Zeev's animals in the past, but with this report we want to share some added information. Zeev's mid-Caucasian tur, taken in Kabardino-Balkariya, Russia, ended up with an overall score of 150 6/8 SCI, which puts it in the SCI record book at #7. Plus, Zeev's Kuban (Western) tur from Karachayevo-Cherkessiya, Russia scored 150 3/8 SCI and will be #18 in the record book. Once again, we would like to share photos of these three outstanding Caucasus tur, plus the Caucasian chamois.
